

Veröffentlichungen

von W.L. Wendland

Dissertation:

Lösung der ersten und zweiten Randwertaufgaben des Innen- und Außengebietes für die Potentialgleichung im R_3 durch Randbelegung. HMI-Bericht b 41 und Dissertation TU Berlin 1965, D 83.

Habilitationsschrift:

Ein elementarer Existenzbeweis für eine Lösung der Beltramischen Differentialgleichung. Habilitationsschrift TU Berlin 1969 D 83 (Kapitel 5 der Monographie [M1]).

Zeitschriftenartikel:

- [1] mit G.Bruhn:
Über die näherungsweise Lösung von linearen Funktionalgleichungen. In: Funktionalanalysis, Approximationstheorie, Numerische Mathematik (Herausgeber L.Collatz, H. Meinardus und H. Unger), Internat. Schriftenreihe Numer. Math., Birkhäuser Basel **7** (1967) 136-164.
- [2] mit K.P. Löhrr:
Die numerische Lösung der ersten und zweiten Randwertaufgaben unter Verwendung elementarer Greenscher Funktionen. Elektronische Datenverarbeitung **4** (1967) 166-172.
- [3] Die Fredholmsche Alternative für Operatoren, die bezüglich eines bilinearen Funktionals adjungiert sind. Math. Zeitschr. **101** (1967) 61-64.
- [4] Die Behandlung von Randwertaufgaben im R_3 mit Hilfe von Einfach- und Doppelschichtpotentialen. Numer. Math. **11** (1968) 380-404.
- [5] Zur numerischen Behandlung der Randwertaufgaben für elliptische Systeme. In: Numerische Behandlung von Differentialgleichungen. Internat. Schriftenreihe Numer. Math., Birkhäuser Basel **9** (1968) 187-207.
- [6] Über potentialtheoretische Randwertaufgaben in einem zusammengesetzten Gebiet mit Übergangsbedingungen und nicht glatten Rändern. Methoden und Verfahren der Mathematischen Physik **2** (1969) BI 721, 125-149.
- [7] Bemerkungen über die Fredholmschen Sätze. Methoden und Verfahren der Mathematischen Physik **3** (1970) BI 722, 141-176.

- [8] mit U. Simon:
Zur Indexmethode in der Differentialgeometrie im Großen. *Math. Zeitschr.* **116** (1970) 242-246.
- [9] Über Galerkin–Verfahren zur Lösung des Dirichlet–Problems in L_p -Räumen für gleichmäßig elliptische Differentialgleichungen. *Abh. Math. Seminar Universität Hamburg* **36** (1971) 185-197.
- [10] Über Ähnlichkeitsprinzip und Randwertaufgaben für verallgemeinerte analytische Funktionen. *Applicable Anal.* **2** (1972) 101-110.
- [11] On boundary value problems of generalized analytic functions. In: *Lecture Notes in Mathematics*, Springer **280** (1972) 120-201.
- [12] An integral equation method for generalized analytic functions. In: *Constructive and Computational Methods for Differential and Integral Equations*, *Lecture Notes in Mathematics*, Springer **430** (1974) 414-452.
- [13] mit R.P. Gilbert:
Analytic, generalized, hyperanalytic function theory and an application to elasticity. *Proceedings of the Royal Society Edinburgh A* **73** (1975) 317-331.
- [14] mit D. Colton:
Constructive methods for solving the exterior Neumann problem for the reduced wave equation in a spherically symmetric medium. *Proceedings of the Royal Society Edinburgh A* **75** (1976) 97-107.
- [15] mit E. Stephan:
Remarks to Galerkin and least squares methods with finite elements for general elliptic problems. In: *Partial Differential Equations*, *Lecture Notes in Mathematics*, Springer **564** (1976) 461-471 und mit ausführlichen Beweisen in: *Manuscripta Geodaetica* **1** (1976) 93-123.
- [16] mit H. Jeggle:
On the discrete approximation of eigenvalue problems with holomorphic parameter dependence. *Proceedings of the Royal Society Edinburgh A* **78** (1977) 1-29.
- [17] mit R.E. Kleinman:
On Neumann’s method for the exterior Neumann problem for the Helmholtz equation. *J. Math. Anal. Appl.* **57** (1977) 170-202.
- [18] mit G.C. Hsiao:
A finite element method for an integral equation of the first kind. *J. Math. Anal. Appl.* **58** (1977) 449-481.
- [19] On a class of semilinear boundary value problems for certain elliptic systems in the plane. In: *Complex Analysis and its Applications*. *Akademija Nauk SSR. Zum 70. Geburtstag des Akademiemitglieds I.N. Vekua*, Izdat. “Nauka” (1978) 108-119.

- [20] On the embedding method for semilinear first order elliptic systems and related finite element methods. In: Continuation Methods (ed. H. Wacker), Academic Press, New York (1978) 277-336.
- [21] mit G.C. Hsiao und E. Stephan:
On the integral equation method for the plane mixed boundary value problem with the Laplacian. Math. Methods Appl. Sci. **1** (1979) 265-321.
- [22] mit G.C. Hsiao und P. Kopp:
A Galerkin-collocation method for some integral equations of the first kind. Computing **25** (1980) 89-130.
- [23] On Galerkin collocation methods for integral equations of elliptic boundary value problems. In: Numerical Treatment of Integral Equations (eds. J. Albrecht and L. Collatz) Internat. Schriftenreihe Numer. Math., Birkhäuser Basel **53** (1980) 244-275.
- [24] mit G.C. Hsiao:
The Aubin-Nitsche lemma for integral equations. J. Integral Equations **3** (1981) 299-315.
- [25] mit E. Stephan:
Boundary element method for membrane and torsion crack problems. Computer Meth. Appl. Mech. Engrg. **36** (1983) 331-358.
- [26] mit D.N. Arnold:
On the asymptotic convergence of collocation methods. Math. Comp. **41** (1983) 197-242.
- [27] mit M. Costabel und E. Stephan:
On boundary integral equations of the first kind for the bi-Laplacian in a polygonal plane domain. Ann. Scuola Norm. Sup. Pisa, Ser. IV, **10** (1983) 197-242.
- [28] mit J. Saranen:
On the asymptotic convergence of collocation methods with spline functions of even degree. Math. Comp. **45** (1985) 91-108.
- [29] mit T.M. Fischer und G.C. Hsiao:
Singular perturbations for the exterior three-dimensional slow viscous flow problem. J. Math. Anal. Appl. **110** (1985) 583-603.
- [30] mit U. Lamp, T. Schleicher und E. Stephan:
Galerkin collocation for an improved boundary element method for a plane mixed boundary value problem. Computing **33** (1984) 269-296.
- [31] mit R. Rannacher:
On the order of pointwise convergence of some boundary element methods. Part I. Operators of negative and zero order. Mathematical Modelling and Numerical Analysis **19** (1985) 65-88.

- [32] mit G.C. Hsiao und P. Kopp:
Some applications of a Galerkin-collocation method for boundary integral equations of the first kind. *Math. Methods Appl. Sci.* **6** (1984) 280-325.
- [33] mit G.C. Hsiao:
On a boundary integral method for some exterior problems in elasticity. *Proceedings of Tbilisi University (Trudy Tbiliskogo Ordena Trud. Krasn. Znam. Gosud. Univ.) UDK 539.3, Mat. Mech. Astron.* **257** (18) (1985) 31-60.
- [34] mit E. Stephan:
An augmented Galerkin procedure for the boundary integral method applied to mixed boundary value problems. *Appl. Numer. Math.* **1** (1985) 121-143.
- [35] mit E. Stephan:
An augmented Galerkin procedure for the boundary integral method applied to two-dimensional screen and crack problems. *Applicable Anal.* **18** (1984) 183-220.
- [36] mit U. Lamp und K.-T. Schleicher:
The fast Fourier transform and the numerical solution of one-dimensional boundary integral equations. *Numer. Math.* **47** (1985) 15-38.
- [37] mit D.N. Arnold:
The convergence of spline collocation for strongly elliptic equations on curves. *Numer. Math.* **47** (1985) 317-341.
- [38] mit T. Fischer und G.C. Hsiao:
On two-dimensional slow viscous flows past obstacles in a half-plane. *Proceedings of the Royal Society Edinburgh A* **104** (1986) 205-215.
- [39] mit M. Costabel:
Strong ellipticity of boundary integral operators. *Crelle's Journal für die Reine und Angewandte Mathematik* **372** (1986) 34-63.
- [40] mit S.Christiansen:
On the condition number of the influence matrix belonging to some first kind integral equations with logarithmic kernel. *Applicable Anal.* **21** (1986) 175-183.
- [41] mit J. Saranen:
The Fourier Series representation of pseudo-differential operators on closed curves. *Complex Variables, Theory and Appl.* **8** (1987) 55-64.
- [42] mit R. Rannacher:
On the pointwise convergence of some boundary element methods. Part II: Operators of positive order. *Mathematical Modelling and Numerical Analysis* **22** (1988) 343-362.
- [43] mit J. Kral:
Some examples concerning applicability of the Fredholm-Radon method in potential theory. *Aplikace Matematiky* **31** (1986) 293-309.

- [44] mit E. Stephan:
A hypersingular boundary integral method for two-dimensional screen and crack problems. *Archive Rat. Mech. Anal.* **112** (1990) 363-390.
- [45] mit K. Ruotsalainen:
On the boundary element methods for some nonlinear boundary value problems. *Numer. Math.* **53** (1988) 299-314.
- [46] mit Yu Dehao:
Adaptive boundary element methods for strongly elliptic integral equations. *Numer. Math.* **53** (1988) 539-558.
- [47] mit I. Sloan:
A quadrature-based approach to improving the collocation method for splines of even degree. *Zeitschr. Analysis Anw.* **8** (1989) 361-376.
- [48] mit W. Mc Lean:
Trigonometric approximation of solutions of singular integral equations and pseudo-differential equations. In: *Operator Theory: Advances and Applications*, Birkhäuser, Basel **4** (1989) 359-383.
- [49] mit H. Berger und G. Warnecke:
Finite elements for transonic potential flows. *Numer. Meth. Partial Differential Eqs.* **6** (1990) 17-42.
- [50] mit W. Mc Lean und S. Prößdorf:
Pointwise error estimates for the trigonometric collocation method applied to singular integral equations and periodic pseudodifferential equations. *J. of Integral Equations and Applications* **2** (1989) 125-146.
- [51] mit G.C. Hsiao und E.P. Stephan:
On the Dirichlet problem in elasticity for a domain exterior to an arc. *J. of Computational and Applied Mathematics* **34** (1991) 1-19.
