Homogenization of Compressible Two-Phase Flow in Porous Media

Abstract: We study the homogenization of a non-local Navier–Stokes–Korteweg system in a periodic porous medium with Dirichlet boundary conditions. Models of the Navier–Stokes–Korteweg class are used to describe the isothermal dynamics of a fluid that can occur in two phases and allow for phase transitions. In the limit we obtain a non-local Cahn–Hilliard system.

Alle Interessenten sind herzlich eingeladen!

$$\|U - u\|_W \lesssim \left(\sum_{E \in \mathcal{E}_G} \mathcal{E}_G^2(U; E) \right)^{1/2}$$

$$\partial_t u + \operatorname{div}_x f(u) = 0$$
